

## **TECNORIB: AT THE CANNES YACHTING FESTIVAL 2017 WORLDWIDE PREMIERE FOR THE NEW PIRELLI 1900**

**Tecnorib new flagship will be officially presented at the next Cannes boat show**

The new **PIRELLI 1900** is scheduled to make its official debut at the upcoming **Cannes Yachting Festival 2017**, with a renewed **partnership between Tecnorib and Pirelli**. Designed by **Mannerfelt Design Team**, it is built to the highest standards of quality, starting with the resin infused hull and the 100% carbon hardtop, designed to lower the center of gravity and improve performance.

The new PIRELLI 1900 reprises the lines of the previous PIRELLI 1400, but reinterprets them from a new, innovative, perspective, with an even greater focus on the development of communal areas. The outstanding feature is the design of the carbon hardtop, which extends aft to protect the cockpit. The scene-stealer in the bow is the huge sun lounging area, while in the stern, the entire cockpit area can be customised.

The hull has been designed to offer high performance without compromising on comfort: it isn't particularly narrow, which translates into hospitable interiors with a height of up to 2 meters.

In the engine room, **two 800 HP MAN 16 engines** with surface-piercing propellers are coupled with Top System transmissions: **top design speed is of 45 knots**, while remaining easy to handle at all times thanks to the joystick and automatic trim system.

Below deck the interiors are **elegant and essential**. The basic layout features **two cabins** and the central living area, containing the galley, a dinette that can be transformed into an additional berth, and a dining table. The owner's cabin is in the bow, in the stern, the guest cabin, a head and a big and extremely practical technical storage compartment that, in a second solution available (the one we'll see debuted at the Cannes Show), is replaced by a third cabin for the crew.

As always, the distinctive Pirelli tyre tread design appears on the inflatable tubes, like all the boats in the range, with the pattern of the Blue Wet tread used by Pirelli in top track races, paying tribute to the expertise gained by Pirelli designing tyres for extremely wet conditions.

Together with the new boat, other models from the classic range will be on display: **PIRELLI 880**, **PIRELLI 1100** and **PIRELLI 1400**.
