PIRELLI 1900

SPORTIVENESS AT ITS MAXIMUM POWER

Source: **Pirelli** Design

Pirelli is perhaps one of the largest car tire manufacturers in the world, and from time to time the Milanese company likes to think big and create different products. Earlier in the year it collaborated with rubber-boat maker **Tecnorib**, and blossomed in building the **pirelli** '1900' boat. It was introduced to the audience at the Cannes yachting festival.

Specs:

Length: 18,5m

Height: 3,7m

Maximum Width: 5,0m

Fuel tank capacity: 2000ltr

Engines: 2 x MAN i6 (2 x 800HP)

Propulsion: Top System T65

Maximum speed: 45 knots

Cruise speed: 30 knots

"The biggest [Tecnorib](#) ever, is built to the highest standards of quality, starting with the resin infused hull and the 100% carbon hardtop."

[Pirelli & Tecnorib](#) are continuing their long-running partnership, having created three boats together over the past ten years. The '1900' vessel is based on the design of their '1400', featuring a slender hull measuring 61 ft (18.5 m) long, by 16.4 ft (5 m) wide. In the typical fashion of these [pirelli](#) watercrafts, each inflatable rubber tube is adorned with a tire tread.

The '1900' is still designed to feel sporty, despite being the largest [pirelli](#) boat to date. It features a carbon-fiber roof, and twin 800 hp (597 kW) engines with

surface-piercing propellers – letting the boat deliver a maximum speed of 45 knots (83 km/h) in ideal conditions. The recommended cruising speed is a more leisurely 30 knots (56 km/h). The captain controls the '1900' with an automatic trim system and joystick, crafted for smooth sailing at any speed. There's plenty of room inside the cabin too – headroom peaks at two meters (6.56 ft) below deck, where passengers can find two cabins, two bathrooms, plus a central living area. ■
